# BerkelBike Connect

*Do you not have enough power in your legs? Then the BerkelBike is the right choice for you! The BerkelBike Connect is easily attachable to your wheelchair and is driven by arm as well as leg power. Many people have attached their Connect already and cycle again or cycle better now. Do you have any other disabilities? We are happy to adjust the BerkelBike for you.*

- **Cycling with arms and legs**
- **Electric propelling assist possible**
- **Easy to attach**
- **Suitable for nearly any wheelchair**
- **Adjustable to your needs**

## BerkelBike Connect

The BerkelBike Connect gives you the freedom of cycling outdoors from the comfort of your own wheelchair. The quick-release mechanism fitted to your wheelchair allows you to easily connect and release the BerkelBike attachment. This omits the need to transfer and allows the Connect to be put in the back of a car. With 8 Shimano gears, a hand cycle back pedal brake and disc brake, is the BerkelBike luxuriously equipped.

## Tacx

The BerkelBike Connect can be transformed into a home trainer in a trice. Ask for the Tacx brochure for more information.

## FES

The leg and buttock muscles of people with a spinal cord injury can be activated by electric pulses. Ask for the BerkelBike FES brochure.
