

BerkelBike

PRO

the way to move

Sponsored by:

BerkelBike Pro

The BerkelBike Pro is a complete tricycle with the propulsion coming from both arm and leg power. This makes it very suitable for people with reduced power in their legs. Due to the combined propulsion, the stronger limbs help the weaker limbs. Therefore, one can cycle longer distances and achieve higher speeds.

- **Cycling with arms and legs**
- **Lightweight aluminium**
- **Comfortable**
- **Stable**
- **Adjustable**

BerkelBike Pro

Since you cycle with your arms and legs the physical exercise is maximal. This results in a complete workout with many health benefits. Cycling on a BerkelBike improves among others the general health and the blood circulation. The optional auxiliary electric motor serves as pedal assistance, in case you need a little help while cycling.

Tacx

The BerkelBike Pro can be transformed into a home trainer in a trice. Ask for the Tacx brochure for more information.

FES

The leg and buttock muscles of people with paraplegia can be activated by electric pulses. Ask for the BerkelBike FES brochure.
